**Total of participants:** 19 youth workers 3 from each country.

**Basic info about the project and its topic:** We want our youth to be better prepared to face up the professional path in order to prevent a part of the unemployment situations and other working issues that they are suffering nowadays. To get this aim is important to increase their self-confidence and to develop their problem solving and critical thinking abilities as well as to work with them in order to improve the knowledge, attitude and skills regarding social skills or other competences regarding creativity, initiative and communication. How? Thanks to methods based on theatre that is are a powerful tool and way to learn.

We think is important for the Youth Workers that will address these needs in youth, to have opportunities in which they could experience, learn, discover and improve their skills and knowledges in implementing creative and innovative methods regarding drama techniques in order to increase their tools for their youth work that will help to develop better some competences, sometimes forgotten in the educational system, that are basic for learning some competences that are important in life and to deal with the professional path.

In this T.C we want the Youth workers that will participate to get closer to improvisation, image, forum theatre and other drama exercises that are great ways to guide the youth for analysing situations, thinking in a critical way, suggesting solutions, taking action, developing many important skills and competences and acquiring a better attitude that will help them in their personal and professional life.

And last but not least, due to the enriching atmosphere and the diverse group of participants that we will have, we will learn from each other's experiences, cultures, ideas and backgrounds.

## Objectives:
